Randy,  
3-4pm tomorrow we are free. You can just call my office phone.

Let me know if that works.

Hi Ruth,

Thanks for the reply. Any chance of discussing sometime today or tomorrow? I'm having a call with OAQPS/ORD on this issue and it would good to have your input prior to that call.

I'm available this afternoon except for 2pm CST. Open tomorrow pretty much after 11am.

Otherwise, I am free Friday or Monday.

Randy

Hey Randy,

Sorry I missed your calls. I'm always running from meeting to meeting. We did review some modeling that involved CTDMPPlus and we'd be happy to talk about what we learned.  
We are around Friday morning or Monday morning of next week if that works. Otherwise feel free to propose a time.  
I'm cc'ing David Brown because he is the modeler here that took a look at USG's proposed modeling.

Ruth

**Subject:** RE: USG modeling contact

Hi Ruth,

Tried to call a couple times. I will be the modeling contact for any USG modeling. Dan is the enforcement contact (although he has some modeling experience.)

USG hasn't submitted any modeling recently but the latest information they shared during a meeting a couple weeks ago involved CTDMPPlus. We haven't given a thumbs up or down yet on that approach.

I'd be interested in talking with you guys as well when you have a few minutes. Let me know when would be a good time to give you a call.

Thanks, Randy

Hi Randy,

Will you be reviewing the modeling for USG? I can't find where Dan Schaufelberger works and have not worked with him on anything before. Is he a modeler?

I'd like to understand what the modeling submittal covered as we reviewed their earlier modeling submittal and had a few issues with it. Just curious, in case we end up looking at it in the future.

Thanks,

Ruth

Subject: USG modeling contact

Cory:

I got your voicemail. There are a number of people that will be involved in reviewing USG's protocol and modeling. But the best single point of contact, someone with modeling experience and that knows the enforcement case (NOV, negotiations, etc), would be Dan Schaufelberger, 312-886-6814, whom I copied on this email.

Feel free to reach out to him. If there are questions he can't answer, he will certainly pull in others.
